

# PASCAM Handicraft-Edition

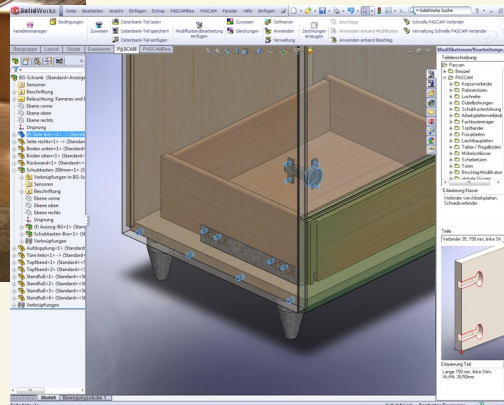

The **PASCAM Handicraft-Edition** bundles the world's leading 3D system SolidWorks® with our industry proven woodworking solution **PASCAM WoodWorks**.

Easy and efficiently, you can create 3D models for every imaginable product. Woodworking-specific design tasks, such as adding hardware fittings and typical woodworking joints of any kind are supported by efficient automation technologies. The full and complete material representation, the fast and reliable profiling and the quick variant design of existing product models is implemented based on open, prefabricated and user-defined, customizable libraries.

## Powerful 3D modelling for handicraft businesses

field-proven, universal, efficient

The broad application range of **PASCAM Handicraft-Edition** in your company:

In the *offering phase*:

- for a photo realistic virtual product presentation.
- for the quantity determination at the preliminary calculation.

In the *production/manufacturing planning*:

- for the automatically created wood lists and the processing data.

In the *workshop*:

- for the illustration of the product to be manufactured by drawings, sectional views and online available 3D models.

## The universal 3D-CAD tool for woodworkers and joineries

A universally applicable 3D design system for users in the woodworking sector

Completely integrated in SolidWorks®

Maximum freedom for user specific designs - no constraints on manufacturable models

User-friendly user interface, easy to operate for beginners

Broad file import/export capability for numerous formats (DXF/DWG/...)

Convincing product presentations supported by RealView technology

Easy animation of product models by SolidWorks® Animator

Quick, associative deduction of the construction drawing from the 3D model, including sectional drawings and detail views in arbitrary scales – also available as SolidWorks® eDrawings

User defined generation and export of material lists, i.e. BOM, edge lists, etc.

Standardized wood list generation at the press of a button

High manufacturing security, due to implemented real-life manufacturing principles for the design processes

Newest design technology, individually adjustable to your company standards

# PASCAM Handicraft-Edition

## Quick and flexible design of customer-oriented products

The **PASCAM Handicraft-Edition** includes, in addition to our SolidWorks®-based, woodworking CAD system **PASCAM WoodWorks**, extensive training and support services, directly delivered by the software producer itself, for a successful operational use in your company from day one. - And all of that at a incredibly low price!

### The package contains in particular:

- The 3D system SolidWorks® as a Standard Edition (OEM)
- **PASCAM WoodWorks** with all available libraries
- Linking to existing ERP systems / business solutions
- PASCAM Hardware library /w implementation of 5 new items for your company
- Software maintenance for SolidWorks® + **PASCAM WoodWorks** for 1 year
- 5 days user training, incl. installation of SolidWorks® + **PASCAM WoodWorks**

The **PASCAM Handicraft-Edition** is available at an introductory price of 10.000€

- *Ordering until 31/12/2010 will save you 200€ for the software maintenance in the 2nd Year!*

### Your benefits:

- Approved application, based on the world's leading 3D system SolidWorks®
- Quick, efficient and safe use - right from the first day - due to comprehensive user training and support
- Software maintenance via internet, phone and email support by PASCAM
